

MAGNET ACCESSORY PACK

To Attach Secure Door Safety Banner To Metal Doors
Package Contains Four Magnets With Clip Attached

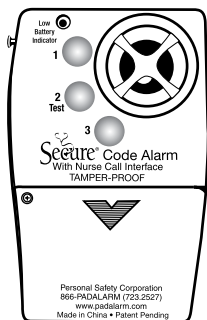

Model # DBMA-4 • Made in China

Please see Secure® Door Safety Banner instruction sheet contained in each safety banner package for use of banner, set up instructions and washing instructions. The safety banner can be attached to the walls on both sides of a door using the adhesive strips included in each package.

The enclosed magnets with metal clips attached provide an alternative option of attaching the Secure® Safety Banner to a metal door frame of any width as illustrated above:

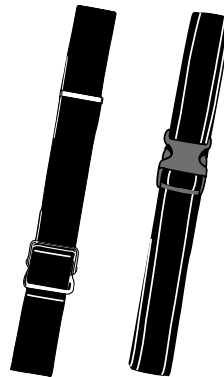

1. Determine if you want "STOP" or "DO NOT ENTER" facing on the outside of the door.
2. Attach one clip to the top left side of the banner and affix the attached magnet to the metal door frame. Attach one clip to the bottom left side of the banner and affix the attached magnet to the metal door frame.
3. Extend banner to opposite side of door and attach one clip at the top right side of the banner and affix the attached magnet to the metal door frame. Attach one clip to the bottom right side of the banner and affix the attached magnet to the metal door frame.
4. Adjust height of banner so it is positioned on the metal door frame between waist and chest level. If you need to make any adjustments to center banner in door opening simply move clips accordingly.
